Port Clearance

Regulatory Compliance

Emissions Monitoring

Terminal Operations & Efficiency

Predictive Analytics & Data Intelligence

Vetting for You, Like You

Configurable vetting processes with flexible rule profiles, ready-to-use templates and streamlined workflows.

Mainstay puts you in control, with tools that **support better, more efficient human decision-making - not replace it** - delivering timely, data-driven insights that empower your team to make more informed, confident choices at every step.

Pre-built industry templates

Utilise MIS prepared templates to minimise manual data entry and improve efficiency.

Process automation

Instant evaluation of vessel acceptability; detect potential risks and accelerate decision-making with streamlined processes.

A single system for seamless collaboration

Keep all stakeholders aligned with a single, unified system where everyone can access the latest information and updates.

Seamless integration with data sources

Connect with existing systems and data sources to maintain consistency and eliminate data silos.

Role-based permissions

Ensure data security by granting tailored access permissions based on roles and responsibilities.

Alerts on critical changes for proactive vetting

Stay informed with timely updates on critical compliance changes or risk factors.

Tailored reports and insights

Generate powerful reports that translate your data into actionable intelligence, helping you track trends, monitor risk and meet internal and external reporting requirements with ease.

End-to-end workflow integration

Connect every step of your vetting and compliance process, from nomination and screening to reporting and audits, within a single unified system for maximum efficiency and consistency.

Everything You Need for Confident Vetting

Apply your entire vetting
policy in a single click

Mainstay delivers colour-coded risk status, instant decision-making, and always-on compliance monitoring.

Your Single Source of Vessel Intelligence

Mainstay seamlessly integrates with the industry's most reliable data sources, delivering timely insights to enhance vetting decisions for safer, more informed operations.

OCIMF

SIRE 2.0, SIRE, BIRE, OVID, TMSA, OVMSA, Particulars Questionnaires, Crew Matrix, Incidents, PSC Inspections, MTMSA and MTPQ.

S&P Global

Vessel details, ownership, PSC Inspections, casualty data.

USCG

Incidents, PSC Inspections, Vessel Details.

Regulatory Compliance

Proactive watchlist monitoring global sanctions sources.

AIS Geolocation

Vessel tracking, port call history, dark activity and concealed cargo activities

Marine Data Hub

Seamless collaboration and communication across the marine and energy sectors.

Modular Flexibility for Smarter Assurance

Mainstay is built on a modular foundation, giving you the flexibility to configure the system to the exact needs of your marine assurance operation. Whether you're a one-person vetting team or a multi-national enterprise, our modular approach means you only use the features you need, with the freedom to scale as you grow.

This adaptability allows us to support a wide range of customers, from small, focused vetting teams to global charterers, without compromising on performance or usability.

Compliance

Integrate seamlessly with global bannings lists and sanction sources to provide visibility and inclusion across your vetting practices.

Geolocation

Leverage AIS data for detailed insights into voyage history, port calls, dark activity, STS events & monitored zones to deliver clear, timely visibility of location-based risks.

Marine Terminal Operations

Enhance visibility, efficiency and control through integrated end-to-end terminal scheduling and cargo movement management.

Marine BI

Process and aggregate big data to identify global and local trends, forecast potential events, and support smarter, statistically informed operational decisions.

An aerial photograph of a large oil tanker ship docked at a pier. The ship is white with several large white spherical storage tanks on its deck. Several smaller tugboats and support vessels are positioned around the tanker, some connected to the pier by moorings. The water is a deep blue-green color. In the top right corner, there is a decorative graphic consisting of overlapping blue and white geometric shapes.

Mainstay delivers industry-leading marine risk management for tankers, barges, offshore vessels and their operators. Built for energy companies and designed to evolve with your risk requirements, it ensures your vetting processes stay compliant, efficient and future-ready.

From vessel screening to terminal performance, Mainstay enables you to work faster, safer and smarter.

Dominic McKnight Hardy
Managing Director, MIS Marine

Complete Confidence From the Very Beginning

Enterprise-Grade Security. Built in.

Mainstay is built on a foundation of trust, with security and compliance at its core. The platform adheres to ISO 27001:2022 standards and is Cyber Essentials Plus certified, ensuring your data is protected to the highest industry benchmarks.

With robust encryption, audit-ready logging, role-based access controls and continuous monitoring, Mainstay safeguards sensitive information while supporting full transparency and accountability.

Dedicated Hosting. Your Data, Your Rules.

Mainstay runs in a single-tenant Azure environment, giving each customer a fully segregated network - keeping your data in its own private network for maximum isolation and control.

Flexible backup, redundancy and retention options let you set policies that match your risk and compliance needs, so you stay fully in control from day one.

Guided Onboarding. Ongoing Support.

Getting started with Mainstay is simple. Our onboarding process is guided by experts who understand the marine assurance landscape, helping you get up and running quickly. Once live, you'll have access to ongoing support from a responsive, specialist team dedicated to your long-term success.

Whether you're a new user or scaling your operations, we're here to support every step of your journey.

Ready for Now. Prepared for What's Next.

Mainstay isn't just built to meet today's standards - it's built to stay ahead of them. Our in-house development team continuously refines and enhances the platform, responding to customer feedback, regulatory changes and emerging industry needs.

You benefit from regular updates, new features and performance improvements. Whether it's adapting to a shifting compliance landscape or unlocking smarter ways to manage risk, Mainstay evolves to keep you future-ready.

Mainstay Features Check List

- End-to-end support for tankers, barges and offshore vetting ✓
- Integrated compliance with over 40 global sanctions databases ✓
- Dynamic mapping of vessel/operator relationships ✓
- Scalable from team-level to enterprise deployments ✓
- Modular by Design – Start with what you need, expand as your requirements grow ✓
- The “Golden Record” – one trusted source of truth ✓
- Customised business logic for smarter vetting ✓
- AI-powered insights for trend analysis and proactive risk management ✓
- Backed by a global Community of Best Practice ✓

Build the assurance solution that works and grows with you

We'd love to understand your challenges

Let's start the conversation

Whether you'd like to see Mainstay in action with a personalised demo, have a quick question, or want a full breakdown of features - we're here to help.
